Description

The materials used to make orthopedic trolleys are **Aluminum alloy 5083, 6082, 99.5** , however, a chemical treatment is performed Anti-corrosion / protective, RAL color anodized on each piece.
All screwdrivers are made of INOX AISI 304/316 that make up the orthopedic cart.

Alloy Wheels

Plastic materials are derlin / polizene / phd derived from the food industry.

Tissue and wrinkles are antiallergic / water repellent / stain resistant and do not tear off the hair and with a simple gesture, you can put it and remove it from the orthopedic trolley and wash it in a 30 degree washing machine. Engravings , On every detail of the doggy orthopedic cart, are made of laser.

The only one with marking (CE) produced and built entirely in Italy.

The doggy orthopedic trolley has been designed and tested with care, utmost seriousness And experience, with the close collaboration of Dr. Andrea Martinoli and the experience in the mechanical field of Mr. Maurizio Canazza.

Doggy and Idrotech 2000 are produced by Maclaren.
